

# WISE Research Master's Thesis

## Leverage your 5th master's year for research, integrated into your current program profile

**Are you ready to take the next step toward a future shaped by scientific discoveries and innovation?**

 Research drives societal progress toward a sustainable future and gives industry a competitive edge

 Through the WISE Research Program, selected master's students receive a SEK 75,000 stipend, access to advanced credited courses, and the chance to conduct a 30-credit thesis in a leading research environment

 You get to experience cutting edge research, build skills that strengthen your PhD competitiveness, and open strong career paths in both academia and industry

### MORE INFORMATION

### About

- A preparatory initiative for master's students aspiring to pursue doctoral studies
- Designed to give students a strong head start, enhance their competitiveness for PhD positions, and offer an opportunity to experience what it is like to work as a researcher
- The thematic focus is on Materials Science for Sustainability

### Why WISE

- A unique national initiative with a strong sustainability mission, advancing the future of Materials Science for Sustainability with close ties to Swedish industry
- Access to a nationwide network of leading research environments

### Who Can Apply

- Ambitious master's students enrolled in Swedish programs in engineering or natural sciences
- Motivated by sustainable materials and scientific challenges
- Curious about exploring a future PhD path
